GOSPEL

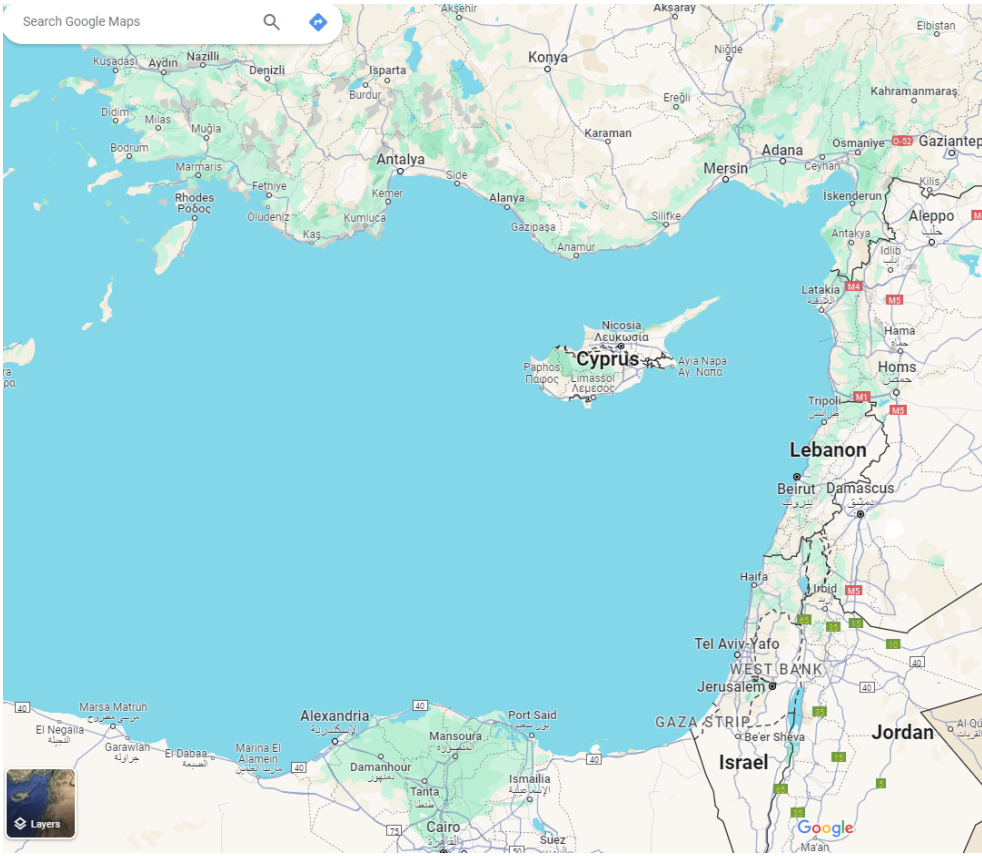
by **JASON WELCH** &

MAILIN TEKER

The black Prince submarine glides through the dimension gate into the dark waters of the Pacific Ocean near the coast of ECUADOR .
CAPTAIN CORWIN Surface to periscope depth MR PICCOLO steer a course towards CENTRAL AMERICA through the PANAMA CANAL , WHILE I GO TO MY ROOM AND PUT A TRILBY HAT ON AND LISTEN TO COUNTRY AND WESTERN MUSIC>>
The main viewers shows the view from the hull of the ship then a tactical display of the area overlaid with sonar readings .
CAPTAIN CORWIN Mr Carmichael page DOCTOR GOODFELLOW, CAPTAIN CHAMBERS AND PETER ELGIN in my ready room .
CAPTAIN CORWIN leaves the command chair and walks through the hexagonal guardrail to the sliding doors into the main gantry just as SKIP CARMICHAEL pages the doctor on the INTERCOM .
CAPTAIN CORWIN And try to get a signal from the UEO as we break the surface give them our report .
CORWIN walks down the main gantry into the conference room and is soon joined by Dr Goodfellow followed by his nurse Tam Holden .
On the main viewer the screen saver of UNITED EARTH OCEANS is replaced by the global chemicals homescreen .
CAPTAIN CORWIN I thought the first thing would be to see what's happening while we've been away .
PETER ELGIN and the global net is still is becoming reliably the biggest
CAPTAIN CORWIN Yes the UEO is indebted to you that chain of satellites was invaluable while we were on GALDA PRIME .
Captain Chambers in Corporal Green comes in and takes their places at the oblong glass table on the Chrome and wickers chairs

as the screensaver of UNITED EARTH OCEANS is replaced by ADMIRAL NELSON from the flagship of the UEO **SEAVIEW** .
ADMIRAL NELSON Welcome back to the crew of the BLACK PRINCE SUBMARINE, can you send me a report on your mission to GALDA PRIME ?
CAPTAIN CHAMBERS We're satisfied with the conclusions of the high council of the galactic Federation that we've felt a moral responsibility to make sure that the animals were eviscerated to procedure .
DOCTOR GOODFELLOW A DENTRASI is a three-legged animal with a round head that's very popular on KALDOR .
ADMIRAL NELSON We're finding small groups of ruton hybrids trying to infiltrate our Society .
CAPTAIN CRAIN Not just in restaurants and bars they're also invading the Federal Government .
CAPTAIN CHAMBERS Great Scott I'm gonna have to get back to my unit in London. Has the Outbreak been as bad there ?
DOCTOR GOODFELLOW I suppose we could try selling them to the Japanese. They'll eat anything , but there are moral issues here .
CAPTAIN CHAMBERS They're intelligent species, it's just they suck your life energy and mimic you .
ADMIRAL NELSON They kill us and they must go .
PETER ELGIN We have a new Earth ambassador to the GALACTIC FEDERATION and I can send you a direct link to the high council .
CAPTAIN CORWIN We'll send you a full report ADMIRAL NELSON we're needed in London for CHAMELEON TOURS .
ADMIRAL NELSON Not that cheap package holidays of yours Peter haven't you got something better to do .
PETER ELGIN Well yes I have to get back to the office and call the viscount committee and assemble all my plants and materials .
ADMIRAL NELSON Any security issues will be dealt with by me and if I have to take it up to the line to Washington you You make sure I'm fully brief because it's my ass on the line as well as yours .
PETER ELGIN Absolutely admiral the VISCOUNT COMMITTEE is ready to help me and they're based at LEEDS UNIVERSITY so I really must get back to the office .
CAPTAIN CHAMBERS Drop me off near London Docklands so I can get back to my headquarters at Battersea palace station and I

still want options .
ADMIRAL NELSON In the meantime I'll keep you posted as to what to do with any routines that are captured
CAPTAIN CRAIN We must finish our topological survey of the crenellations around the fields of Norway .
ADMIRAL NELSON I had wanted to do an oceanographic survey of some of the major waterways when we're not patrolling the neutral zone.
CAPTAIN CRAIN Much better for the flagship of the United earth oceans
NELSON You have my backing for now ROGER expects some mission briefing .
The screensaver save over the UNITED EARTH OCEANS is replaced by the global's network newsfeed and bulletin board
PETER ELGIN That chain of satellites we sent from here to Jupiter has proved invaluable .
DOCTOR GOODFELLOW Here's an interesting story. It seems the university of Cairo sent a group of theologists to a mountain north of Iraq and SYRIA trying to find evidence of NOAH'S ARK and they found an advanced spaceship which crash landed over 3000 years ago .
PETER ELGIN Well that is very exciting
DOCTOR GOODFELLOW The report says the mineral analysis proves it is over 3,000 years old and contaied humans in cryogenic storage for the long voyage through the black void of space .
I'd like to join the new survey
PETER ELGIN And global chemicals will sponsor you signal my man in CAIRO to meet you on the coast of the black sea .
SKIP CARMICHAEL That'll Be the town of Spatula used to be the town of Dimplex on the coast of the Black Sea .
CAPTAIN CORWIN I'll sail around the Cape of good hope to the mouth of the Mediterranean .



Skip Carmichael and Peter Elgin walks through the main gantry past the ballast tanks then up a vertical ladder and out on deck .
SKIP CARMICHAEL uses a remote control releasing an inflatable dinghy from the side of the Hull and they climb down the Hull and start the outboard motor pointing its nose to Florida on the east coast of America .
SKIP CARMICHAEL ETA of the Everglades one hour now Elgin, your global chemical transmitters are good .
PETER ELGIN But even they can't call NEIL WOSHAK, my chief of staff and ask him to meet us in the EVERGLADES in a hovercraft .
SKIP Carmichael You know I haven't seen a hovercraft and the Everglades since I watched GENTLE BEN on CBBC starring Dennis Weaver .
PETER ELGIN Yeah I saw that show as well. It was on after blue Peter .
Inflatable dinghy glides into the large Rocky boulders surrounding

the Everglades and cruises through the grasslands and large reads round a Rocky outcrop where a hovercraft waits .They step up the inflatable ring at the base and into the cabin and except a lime juice cordial from NEIL WOSHAK .
PETER ELGIN SKIP this is my chief of staff NEIL, reliable since I caught him pilfering funds . NEIL WOSHAK Oh come on boss I wasn't myself at the time , you caught me in Venezuela . PETER ELGIN So straight to Miami Airport as quick as you can LIEUTENANT CASTILLO.
>>>

CHEVROLET and drives from Long Island over a suspension bridge through the rush hour traffic of MANHATTAN and park up outside the EMPIRE STATE BUILDING .
PETER ELGIN I hope you've been keeping global chemical ship shape and Bristol fashion well. I've been away on GALDA PRIME .
NEIL WOSHAK I'm sure the border trustees are dying to know how you got on ,but they wanted to know about those rolling roads that were taken from Memphis facilities in South America
They get out of the Chevrolet convertible and walk up the Stones steps and into the entrance where janitors are cleaning a maroon marble floor and office clerks are collecting mail from post boxes through reception and into the elevator that takes them up to their offices .
PETER ELGIN You can tell the border trustees that all missing items have been put back in stock,
NEAL WOSHAK Well that's very good
PETER ELGIN They were after somebody's job weren't they NEAL ,And I can't tell them components and conveyors were taken to the other side of the galaxy to Nimbus 3 .
They walk into the global chemicals office where Carol Hughes is administering and down the charcoal gray tiled carpet past prints of retired colonels and foreign ambassadors and recline onto a Lewis Escargos sofa next to a coffee machine with out of date yoga magazines on the oblong glass table .
NEIL uses the remote control and makes a conference call relayed on an 8 foot high wall mounted LED screen and Vice chancellor Martin Emerson is seen walking through reception of LEED UNIVERSITY with the head of clicknologic industries Ian Bannon .
PETER ELGIN Can you recall all the VISCOUNT COMMITTEE for a mission .
VICE CHANCELLOR MARTIN EMERSSON Wait till I get to my office .
PETER ELGIN It seems on an extended vacation to Arcadia, PRESIDENT VANESSA BELLAMY was convinced by ARCADIANS to co-produce the terraforming of the fourth planet .
VICE CHANCELLOR MARTIN EMERSSON That we know as Mars .
ELGIN And they're going to need the viscount .

The Black Prince submarine surfaces at the Harbour of the shores of the Black Sea and crew in colored boiler suits taken in at the waist with sleeves rolled up extend a gang plan .Dr GOODFELLOW and his nurse TAM HOLDEM walk out followed by SKIP CARMICHAEL and CAPTAIN CHAMBERS .

CAPTAIN CHAMBERS My scientific adviser should be here but he's on a dangerous mission aside of a volcano investigating lava flow admissions .

DR GOODFELLOW That's fine James your military authority is going to come in handy when we get to northern Syria,

JAMES CHAMBERS You expect me to wave a stick about in front of the TALABAD and let you climb there mountain, MOUNT ARARAT .

CORPORAL GREEN We should have called SGT PALMER and MAJOR BARCLETTE , that would scare the Arabs .

They walk along a row of sailing ships and are greeted by Major Cartwright .

MAJOR CARTRIGHT hello there DR GOODFELLOW, Peter told me to offer you every courtesy .

Across from the Harbour into a car park and a light a people carrier with CORPORAL GREEN in the driving seat . CORPORAL GREEN eats a Granny Smith then guns the engine and drives towards town center .

MAJOR CARTRIGHT I've rented some work units in cooperation with Cairo University . James Stock for the theology department of CAIRO UNIVERSITY was traveling to the site where it is said that Noah's Ark birthed in Northern Syria .

SKIP CARMICHAEL Send him on lots of missions do they?

MAJOR CARTRIGHT Yes ,he just finished an excavation of the great Pyramids and found a chamber at the SPHINX POSTERIOR PASSAGE that contained a journal from an advanced civilization .
CAPTAIN CHAMBERS He then went to the location described in the journal just over from here between Syria and Iraq, a plateau on the Side of the Mountain when a rock opened a door, in the hull of a spaceship.
MAJOR CARTRIGHT When JAMES STOCK and FIONA PLUMPTON of science weekly made their initial investigation they discovered evidence of occupants and advanced machinery . .
DR GOODFELLOW GREAT SCOTT
CORPORAL GREEN I;LL BE BLOWED .
MAJOR CARTRIGHT The metallurgical analysis says that the spaceship crash landed 3,000 years ago .
The People Carrier drives off the highway stopping at a high wire fence and CARTRIGHT uses an INTERCOM keying in his passcode and they drive up to the open double doors where technicians in lab coats are taking readings of machinery .
MAJOR CARTRIGHT We've taken some examples of the machinery that they found when they entered the spaceship .
CAPTAIN CHAMBERS Well it seems a bit far-fetched to me like one of those science fiction movies .
MR PICCOLO Yes, let me just point out one thing. We're lucky to get here and could have avoided major population centers if the sands of the Sahara were pushed into the Mediterranean and sealed over, with Iron Man concrete to create market gardens to feed an ever growing population .
DR GOODFELLOW If market gardens in a closed environment were destroyed, it could significantly impact the air quality and oxygen levels.
FIONA PLUMPTON Market gardens, or any plants in a closed environment, play a crucial role in producing oxygen through photosynthesis and absorbing carbon dioxide.
DR GOODFELLOW Without them the balance of gas would be disrupted,concluding with a decrease in oxygen levels and an increase in carbon dioxide.In a completely sealed environment, the air would eventually run out as the oxygen gets consumed by humans and other organisms, and carbon dioxide levels rise.
MAJOR CARTRIGHT These were retrieved from the space capsule and we think they're cryogenic Chambers built to hold people in suspended animation .

TAM HOLDEM They can reduce body functions to minimum and maintain the human body for Revival .
DR GOODFELLOW Then that's how the crew got her from a fart off planet .
JAMES CHAMBERS AMAZING
MAJOR CARTRIGHT In the second chamber we found what could well have been genetic Banks .
FIONA PLUMPTON Which the crew might have used to store their lifeforce for The Voyage .
MAJOR CARTRIGHT But what we found amazing was that there were server units that can transfer those frozen embryos once fertilized to incubators that will bring them to turn without injecting them into a female host .
DR GOODFELLOW But this is just speculation we can't know for sure until we've done some more tests .
CAPTAIN CHAMBERS This is marvelous but the Medical Association would have my guts for garters if I even attempted to bring life to term in these artificial incubators or to build a similar one .
MAJOR CARTRIGHT Elgin says just to grab the data and send it back with you to LONDON .
CAPTAIN CHAMBERS FINE I'M GOING THERE ANYWAY .
MAJOR CARTRIGHT Well I'll let you have another look around and then take you to a little guest house
FIONA PLUMPTON You can make your reports global chemicals ,and I want an Exclusive for science weekly .
They get in the car and MAJOR CARTRIGHT drives through the streets of DIMPLEX then up a dirt road to an old hacienda with a thatched roof and they step up onto a raised terrace through louver doors .
Miranda is doing the flamenco dance to eager customers on the sawdust covered floor ,with a bowl of fruit on her head ,while buxom waitresses dressed as French maids serve drinks, and take orders to customers .
The ZEBRA SQUAD soldiers are followed by Dr Goodfellow.
DR GOODFELLOW Did you change the batteries in my pacemaker today?
TAM HOLDEM YES
CAPTAIN CHAMBERS and CORPORAL GREEN walk straight to the apartments .
CAPTAIN CHAMBERS Right men will convene in one hour in the conference room for a video conference with Peter Elgin

of global chemicals .
After general abolitions and canned laughter in their hotel rooms they meet at the conference room .
PETER ELGIN James signal the black Prince submarine to take the genetic Banks and incubators back to your lab in Central London for a full analysis and test trials .
TAM HOLDEM CAN DO .
PETER ELGIN The first time I heard that these could be incubators I got very excited .
DR GOODFELLOW Part of the problems of modern society are that instead of warfare modern society reduces fertility and longevity by the systematic taking of their facial hairs .
MAJOR CARTRIGHT It's like when the tides gone out on a sandy beach .
TAM HOLDEM Especially around the scalp .
PETER ELGIN And then I realized that the people from this mystery ship that's been buried for three thousand years Could be the answer .
DR GOODFELLOW If the genetic blanks and incubators do work, 10 ovaries could be fertilized from thousands of seamen donated by hundreds of men . .
CAPTAIN CHAMBERS Since all men win when they ejaculate .
DR GOODFELLOW In the original draft of a Brave New World that is precisely what happens 50 white men and 50 black men bring 10 fertilized white embryos to term then births them in artificial incubatorS similar to these .
They watch as technicians examine the incubators and the machinery surrounding them taken from the Crashed spaceship .
DR GOODFELLOW A NISSAN CAR ROBOT feeds them milk for a month and then they glide off a conveyor belt onto **dried fruit , raisins, sultanas, marshmallowS, nuts and berries** and the child survives on those natural fruits for 2 months .
DR GOODFELLOW The child is then taken to a kindergarten and brought up as a full member of society .
TAMM HOLDEM Sounds much better than the rubbish I read on paperback .
MAJOR CARTRIGHT Yes that may be true but the publisher decided that the original script was so controversial they gave it to a very arrogant policeman which ruined that concept of a growing healthy Society with everyone having a place in life controlled by age and population growth.

PETER ELGIN Maybe we could not duplicate the servo units but we could build the artificial incubator to bring the fetus to term within the 9 month period as if it had been incubated in its mother's womb the natural way .
CAPTAIN CHAMBERS So all these arguments as to who the father is can be avoided with your fertilization methods .
DR GOODFELLOW This makes you wonder why there not standard practice in clinics and hospitals throughout the world already ?
MAJOR CARTRIGHT Absolutely CAPTAIN but there must be some moral or ethical reason why that hasn't happened .
PETER ELGIN So I want that research data
DR GOODFELLOW If the acquisition helps parents avoid arguments as to who the father is and whether you're a good mother .
PETER ELGIN Well, exactly all the problems of modern life could be alleviated with this new birthing process leaving parents to decide whether they want to have children the natural way I'll leave it to the incubators and still provide the genes of the child .
DR GOODFELLOW QUIT SO .
PETER ELGIN CARTRIGHT tell Cairo university I'll sign a contract in felt tip pen if they let me have one of those incubators and the breading units .
MAJOR CARTRIGHT They've agreed .
PETER ELGIN Dr Goodfellow if you'd like to accompany those incubators to a lab I've set up in Central London opposite Trafalgar Square and Harry Sullivan if you can send all the data to me I'll have my people go through it .
CAPTAIN CHAMBERS I've got a meeting with a joint chiefs of staff MILITARY and CIVILIAN .
PETER ELGIN I'm going to take a Pan am flight from JFK airports in long Island over to GATWICK if you can get MAJOR BARKLETTE and SGT PALMER to pick me up I'll meet you at Chelsea barracks .
CAPTAIN CHAMBERS I can get zebra squad to take you to our headquarters .
PETER ELGIN And I'll book my room to the SAVOY hotel, up the strand opposite SHERLOCK HOLMES PUB .
PETER ELGIN and NEIL WOSHAK and march briskly out of their office and take the elevator to the ground floor .
When they arrive at GATWICK they check in at CHELSEA

BARRACKS and then take a jeep to BATTERSEA POWER STATION . MAJOR BARKLETTE uses a wall mounted INTERCOM and drives up the road stopping outside ZEBRA SQUAD HQ .
PARMER and BARCLETTE escort ELGIN and WOSHAK to a laboratory ,where Captain Chambers and Sarah Dunlop are waiting .
PETER ELGIN Eventually we going to need an expert in embryonic fluid if we're going to make these artificial incubators .
CAPTAIN CHAMBERS Yes able semen are ten of penny but it's the embryos .
PETER ELGIN I might have a solution .
SARAH DUNLOP Boss we have to meet Harry Sullivan can you tell us in the way.
They walk out of zebra squad HQ and up to Victoria and then through St James's towards Trafalgar Square .
PETER ELGIN When we get to LEEDS UNIVERSITY I'll ask the vice chancellor
SARAH DUNLOP And how can he get live embryos donated?
PETER ELGIN The VICE CHANCELLOR'S an old hand at getting people for medical experimentation .
SARAH DUNLOP LEGALY I HOPE ?
PETER ELGIN Some of the first year students will jump at the chance to augment their mega student grants .Rumour has it the student union is wise to it now and warn the first year.
SARAH DUNLOP You want me to use my feminine wiles on Martin Emerson when we reach University campus tonight ?
They carry on through St James's and along PAL MAL to Trafalgar Square and walk up to Nelson's Column where Harry Sullivan sitting on one of the Lions ..
PETER ELGIN Harry like you to meet Sarah Dunlop
HARRY SULIVAN Have you given captain chambers His instructions for his meeting with the joint chiefs of staff because I spent all morning sending a memo through my department .
SARAH DUNLOP What's that Harry the ministry of funny walks or the department of discontinued lines .
HARRY SULLAVAN Well a nods as good as a wink and all that jazz .
PETER ELGIN VOTE FOR ME
They leave Nelson's Column and walk straight into CHARING CROSS Underground station to King's Cross and get an express train to LEEDS .

HARRY SILLIVAN, PETER ELGIN and SARAH DUNLOP leave LEEDS train station and alight a HONDA CIVIC and drive to lead university .
Sullivan pulls up at a highwire fence and uses an INTERCOM to gain access to the units next to the main campus and they walk into the glass fronted reception where Diana Bunker is waiting with hot towels .
DIANA BUNKER IAN'S upstairs in design studio waiting for you and I'll call the VICE CHANCELLOR .
They walk over the new beige carpet and up the wide staircase and along an open plan studio with royal blue partitions and walk to the white board on the far side where Ian is using Microsoft PowerPoint .
HARRY SULLIVAN So Ian have you got the designs for the PHAROS PROBE .
IAN BANNAN I can design them luckily KALDOR speaks English so I can translate their blueprints very easily .Our PHAROS PROBE is a similar design but it won't need the the rockets if it's going to be ejected from high altitude from the VISCOUNT onto the surface of MARS .
PETER ELGIN The whole project relies on us having a V-O-C but the top brass insisted on trying to duplicate them .
IAN BANNAN IMPOSSIBLE ?
HARRY SULLIVAN Of course the best humans can come up with is a Sinclair spectrum .
IAN BANNAN Exactly having a trillions of gigahertz for walking and talking Is the Zeitgeist of the human condition .
PETER ELGIN It's impossible without one of the CPU's from KALDOR . CAPTAIN CHAMBERS managed to convince the TOP BRASS to release A V-O-C to us and MAJOR BARKLETTE and SGT PALMER are bringing it's up to us, v36 one

of their standard models .
VICE CHANCELLOR MARTIN EMERSON ARRIVES .
MARTIN EMERSON YOU LIKE ME TO TAKE YOU TO THE VISCOUNT WING OF LEEDS UNIVERSITY ?
HARRY SULLIVAN Oh they've got their own wing now .?
VICE CHANCELLOR MARTIN EMERSON W ell I thought it was best to give them their own wing where they can learn all their flight manuals, keep fit, and practice emergency procedures in case of explosive decompression .
They walk out of CLICKNALOGIC INDUSTRIES and through a gap in the fence into the university campus and enter a glass fronted reception with janitors buffing the maroon marble floor and students going to lectures etc etc /
VICE CHANCELLOR MARTIN EMERSON I'll give you the bridal suite if you're going to stay here all week .
SARAH DUNLOP Oh thank you very much , you coming up now HARRY .
PETER ELGIN I'll have my usual rooms vice chancellor.
They walk up the wide staircase to the first floor .
VICE CHANCELLOR MARTIN EMERSON Sarah if you can book them in and give them an induction .
SARAH DUNLOP Yes I'll give Harry an induction it might be an all-nighter .
VICE CHANCELLOR MARTIN EMERSON The viscount is ready on its Launchpad Peter it's always ready .
IAN BANNAN We just got to get the payload and the trajectory .
VICE CHANCELLOR MARTIN EMERSON We normally align for a rendezvous with Jupiter .A SEPTEMBER blast off is normally best .
IAN BANNAN When Mars and Jupiter are Alined .
VICE CHANCELLOR MARTIN EMERSON I'll see you this evening for BACKGAMMON or BRIDGE .
SARAH DUNLOP We'd love to come, wouldn't we HARRY .
Later on after general ablutions and canned laughter Harry Sullivan walks through a throng of students up to the vice chancellors suite of rooms on the top floor and uses an INTERCOM next to the Oak panel double doors to gain entry, then walks into the Oak paneled reception room with a grandfather clock in the corner next to the portrait in genuine oils of his wife's best friend >>>>>>.

SULLIVAN and DUNLOP proceed past the display cases filled with memorabilia from safari in Africa and voodoo dolls from Haiti and the Dominican Republic and set themselves down on corduroy three piece suite .
They are followed in by Peter Elgin, Jim Ferguson and Eric Youngblood .
HARRY SULLIVAN The viscounts captains reporting in ?
JIM FERGUSSON Yeah we're ready to go .
ERIC YOUNGBLOOD Fortunately there's a homing signal on the Jupiter shuttle and there's a microwave transmitter on Mars so we'll use GPS to home in on the red planet .
SARAH DUNLOP You're not frightened ARES-GOD OF WAR will be waiting for you and ask Zeus or Jupiter as the Romans called him to send a lightning bolt and destroy the VISCOUNT .
ERIC YOUNGBLOOD You know that hadn't occurred to me .
PETER ELGIN I'll ask IAN BANNAN to design a small probe to be blasted into the red eye of Jupiter just in case ZEUS thinks he can take out the VISCOUNT before it reaches JUPITER .
VICE CHANCELLOR comes in and they walk into the games room and start playing backgammon , bridge and OPERATION .
PETER ELGIN YOU'VE CAUGHT HIS FUNNY BONE
ERIC YOUNGBLOOD So all we have to do is follow the homing signal you get the right to dictionary and check it
VICE CHANCELLOR Superb then we're just waiting for that PHAROS PROBE .
Elgin uses the intercom and calls on Ian Bannon
IAN BANNAN A bit busy right now Peter and the components have just arrived so if I have some willing hands for the assembly I can get the PHAROS PROBE assembled before blast off .
ERIC YOUNGBLOOD Let me get this straight, you've got a team in London who are trying to make incubators that will bring a fertilized fetus to birth .
PETER ELGIN in the original script of A BRAVE NEW WORLD the child was released fully formed and then grew on milk for six months then was ejected from a conveyor belt onto dried fruit sultanas raisins apricots and bananas , then collected by a nurse and be brought up as a full member of society .
JIM FERGUSSON But you can't take a woman's ovaries, they're her only protection .
VICE CHANCELLOR I believe they have been some trials but they were abandoned

SARAH DUNLOP I've been doing some checking while on the train coming up here and a female can only donate one ovary and then she needs time to recover .
HARRY SULLIVAN So she can only donate up to six ovaries per year .
VICE CHANCELLOR MARTIN EMERSON the medical department of LEEDS UNIVERSITY can get as many young women who will donate their ovaries
SARAH DUNLOP With the only other problem that the donors have to be white if we're going to give the spermazone a sporting chance .
ERIC YOUNGBLOOD explain yourself Sarah .
SARAH DUNLOP On previous trials of fertilization 10 Ovaries were surrounded by sperm 50% black and 50% white .
PETER ELGIN Well I haven't got all the research data but unless the ovaries are donated by white women we won't know the percentage of fertilization by black men .
VICE CHANCELLOR MARTIN EMERSON leave it to me Peter you go ahead and design the incubators to bring the first fetus through the incubation period to the birthing chamber .
PETER ELGIN And my idea of having one of those scutters made by General Motors and Nissan to feed the milk for six months and then roll off a conveyor belt onto dried fruits, raisins, sultanas and apricots .
HARRY SULLIVAN Then our baby can eat dried fruit for another two months before I collect him .
SARAH DUNLOP That could be a worthwhile project .
PETER ELGIN If this experiment's gonna work we can have a test trial so we're going to need one donor.
HARRY SULLIVAN Sarah, do you think you can provide OVARIES?
JIM FERGUSSON If you take OVARIES from any female that's her only protection from time's winged chariot .
ERIC YOUNGBLOOD What do you mean?
JIM FERGUSSON With the timeline of any human the only protection is the OVARIES which are produced in the cervix to make children .
SARAH DUNLOP If you are going to take them, that alters the timeline and reduces the life expectancy of the donor .
VICE CHANCELLOR MARTIN EMERSON You make 24 a year and you'll have plenty of time to recover .
PETER ELGIN We'll only ask you this once .

SARAH DUNLOP Have you got the medical wing ready to take the ovary out .
VICE CHANCELLOR MARTIN EMERSON Our medical wing is ready and waiting. We can freeze the OVARIES and send them down to the incubators which you're designing based on the incubators you found in the artifact that Cairo University found at the crash site up MOUNT ARARAT .
SARAH DUNLOP I'll stay here if you've got the medical facilities.
HARRY SULLIVAN No you're coming home with me to my bachelor pad in PALL MALL only a stone throw from Trafalgar Square .
As the cock crows for another day of risky higinks MAJOR BARCLETTE and SGT PALMER get into an army jeep and drive to Milton Keynes .They park in front of a five-story office complex called DOMINEX INDUSTRIES and enter the grass fronted reception .
MAJOR BARCLETTE We have orders from GENERAL CARRINGTON for you to release one of your units .
SGT PALMER I have a warrant here from the United Nations intelligence taskforce forceSigned by Kate Stewart herself and authorized by BRIGADIER WINIFRED BAMBERA .
MAJOR BARKLETTE And Robert Baden Powell
MAJOR BARCLETTE and SGT PALMER drive to a highway fence and enter their NI national insurance number into an INTERCOM then drive up the path and stop outside of the glass fronted reception of CLICKNALOGIC INDUSTRIES .
IAN BANNAN walks out and presses for the shutters of unit 1 to rise and PALMER runs over to get a manual pump truck and palette and pulls it over to the back of the truck .
Barclette gets into the back and pushes out a man sized wooden box out onto the palette
IAN BANNAN Put it next to the other components and unpack him . .
They stand the Cabinet against the battleship gray walls of unit 1 and open the lid to find v36, a V-O-C robot, standing vertically .
IAN gets a call on his wrist communicator from Peter Elgin .
PETER ELGIN Are all the components ready?
IAN BANNAN They're ready to start assembly. I'm just waiting for my lads to come over from the main Campus of the university and hopefully I can activate v36 .

A crowd is waiting on the hill at mission control for the VISCOUNT BULK CRUISER as JENNY TREVITHICK opens the visitors center and MIGHTY WHITE gets to his commentary box .
MIGHTY WHITE You join us here for the third mission of the VISCOUNT BULK CRUISER, the start of a MISSION TO MARS .
GABBY MACDOOGLE Yes that's right VISCOUNT will make one orbit of Mars and eject materials onto the surface of the red planet .
JIM FERGUSSON VISCOUNT should arrive there in a few weeks using a GPS tracking signal left on Jupiter and mars .
GENE MOCKMORD And this new high octane fuel ,
A petrol van a petrol truck has driven to the lip of the titan pothole and lowered a fuel pipe down the rocket silo where Eric youngblood has placed it in the fuel tank inlet .He takes out the petrol hose and it's reeled back up to the petrol truck .

ERIC YOUNGBLOOD viscount fully refueled and ready for launching
MIGHTY WHITE This is the first the only fully independence reusable rocket
In the visitors lounge Jim Ferguson walks up to a control console and activates the hydraulics bringing VISCOUNT out of its rocket silo and onto that it's monorail .
MIGHTY WHITE And here come the astronauts in the car park .
An army jeep stops at the car park and MAJOR BARKLETTE and SGT PALMER escort v36 over through the visitors gallery and the crowds of spectators to the side of the monorail and using a step ladder help V36 into the cargo hold .
BARCLETTE and PALMER pull a conveyor away just as the astronauts leave the viewing gallery walking past all the Spectators codons off by rope saying goodbye to their loved ones and step up onto the monorail into the cab of the VISCOUNT .
JIM FERGUSSON Turbines to speed .
The jet engines ignite and the monorail starts down the hill and up the other side and into the air .
GABBY MACDOOGLE Main boosters ready for firing .
JIM FERGUSSWON Fire on my command .
At 40,000 ft the main boosters kick in from the back of the fuselage accelerating the VISCOUNT into the stratosphere .
Back in the visitors lounge Peter Elgin ,Harry Sullivan, Sarah Dunlop and vice chancellor Martin Emerson drink CROWN HERO SODA STREAM from UNCLE WINKEY'S CAKE and CONFECTION factory
PETER ELGIN Well here's the first stage of operation mission to Mars
MARTIN EMERSON Harry if you'd like to take Sarah back .
PETER ELGIN I'm going to my semi-detached house on BLACKPOOL seafront and let the trustees run **GLOBAL CHEMICALS** for a while .
HARRY SULLIVAN OO I COULD CRUSH A GRAPE .
THE END
